Translating as a Purposeful Activity Christiane Nord 2015-09-29 German-language approaches to translation have been revolutionized by the theory of action (Handlungstheorie) and the related theory of translation's goal or purpose (Skopstheorie). Both these approaches are functionalist: they seek to liberate translators from servitude to the source text, seeing translation as a new communicative act that must be purposeful with respect to the translator's client and readership. As one of the leading figures in this field, Christiane Nord gives the first full survey of functionalist approaches in English. She explains the complexities of the theories and their terms, using simple language with numerous examples. The book includes an overview of how the theories developed, illustrations of the main ideas, and specific applications to translator training, literary translation, interpreting and ethics. The survey concludes with a concise review of the criticisms that have been made of the theories, together with perspectives for the future development of functionalist approaches.

Translation Said M. Shiyab 2017-12-18 This book introduces students to the theory and practice of translation. It also examines issues that are often debated such as the concept of meaning, translation as an art or science, fallacies of translation, and translation rules and ethics. Chapters in this book can be used to teach any course introducing students to the field of translation. One of the distinguishing features is that there is a set of questions found at the end of each chapter that tests the student's knowledge of the information covered. In

addition, some relevant texts are provided for students to translate into the target language, something that is hardly ever found in textbooks on translation. In addition, the book introduces legal and scientific translation and offers real life examples that have been carefully selected for classroom practice. Major aspects of teaching and learning translation, such as collaboration, are also covered. Thinking Chinese Translation is essential reading for advanced undergraduate and postgraduate students of Chinese and translation studies. Translating Cultures David Katan 2014-06-03 As the 21st century gets into stride so does the call for a discipline combining culture and translation. This second edition of *Translating Cultures* retains its original aim of putting some rigour and coherence into these fashionable words and lays the foundation for such a discipline. This edition has not only been thoroughly revised, but it has also been expanded. In particular, a new chapter has been added which focuses specifically on training translators for translational and intercultural competencies. The core of the book provides a model for teaching culture to translators, interpreters and other mediators. It introduces the reader to current understanding about culture and aims to raise awareness of the fundamental role of culture in constructing, perceiving and translating reality. Culture is perceived

throughout as a system for orienting experience, and a basic presupposition is that the organization of experience is not 'reality', but rather a simplified model and a 'distortion' which varies from culture to culture. Each culture acts as a frame within which external signs or 'reality' are interpreted. The approach is interdisciplinary, taking ideas from contemporary translation theory, anthropology, Bateson's logical typing and metamodel theories, Bandler and Grinder's NLP meta-model theory, and Halliday's functional grammar. Authentic texts and translations are offered to illustrate the various strategies that a cultural mediator can adopt in order to make the different cultural frames he or she is mediating between more explicit.

Metaphor and Translation Richard Trim 2019-10 This volume brings together the ideas put forward at an international conference on Metaphor and Translation held at the University of Toulon, France, in June 2017. The bilingual nature of the contributions here provides an insight into recent linguistic theories from both the English- and French-speaking worlds. This diversified approach is further enhanced by contributors being based in a large number of countries worldwide and working on different language combinations. The kinds of problem areas investigated here include a wide range of themes. They cover aspects ranging from methodological and theoretical issues to specialist areas such as literature, culture and the economy. Whatever the theoretical approach applied, the findings come up with interesting and useful conclusions as to how metaphor is translated in the types of discourse analysis proposed. As a result, this volume will be of interest to both scholars and students involved in metaphor studies and translation, as well as to professional translators wishing to keep track of recent theories and practical issues in the field.

Chapters 3 to 7 provide some of the conceptual and methodological tools needed in this area of research, with detailed discussion of such topics as theoretical models of translation, types of research, asking questions, making claims, formulating hypotheses, establishing relations between variables, and selecting and analyzing data. Chapters 8 and 9 are about presenting one's research, in writing as well as orally. Finally, chapter 10 deals with some of the criteria commonly used in research assessment, especially in the assessment of theses. The authors provide detailed guidance on further reading throughout. Stylistic Approaches to Translation Jean Boase-Beier 2014-06-03 The concept of style is central to our understanding and construction of texts. But how do translators take style into account in reading the source text and in creating a target text? This book attempts to bring some coherence to a highly interdisciplinary area of translation studies, situating different views and approaches to style within general trends in linguistics and literary criticism and assessing their place in translation studies itself. Some of the issues addressed are the link between style and meaning, the interpretation of stylistic clues in the text, the difference between literary and non-literary texts, and more practical questions about the recreation of stylistic effects. These various trends, approaches and issues are brought together in a consideration of the most recent cognitive views of style, which see it as essentially a reflection of mind. Underlying the book is the notion that knowledge of theory can affect the way we translate. Far from being prescriptive, theories which describe what we know in a general sense can become part of what an individual translator knows, thus opening the way for greater awareness and also greater creativity in the act of translation. Throughout the discussion, the book considers how insights into the nature and importance of style might affect the actual translation of literary and non-literary texts.

Soon after, Ayesha Begum, recovering from the birth of her second child, receives a letter from the air force stating that her husband Joynal Abedin has been sentenced to death, convicted of insurgency. But has the verdict been carried out? If it was, when and where was he executed? If he was indeed hanged, what has happened to his body? Trying to find answers to these questions, Ayesha embarks on a long and arduous quest to search for her husband, reminiscent of Behula's epic journey in her effort to resurrect her dead husband Lakhinder in the Bengali folktale Manashamangal. Set against the backdrop of a raging famine, political assassinations and coups that took Bangladesh by storm right after its independence in 1971, Anisul Hoque's *The Ballad of Ayesha* is as much a story of the newly created nation as it is the story of its people.

Teaching Translation from Spanish to English Allison Beeby Lonsdale 1996 While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

Text Typology and Translation Anna Trosborg 1997-11-27 This book breaks new ground in translation theory and practice. The central question is: In what ways are translations affected by text types? The two main areas of investigation are: A. What are the advantages of focusing on text types when trying to understand the process of translation? How do translators tackle different text types in their daily practice? B. To what extent and in what areas are text types identical across languages and cultures? What similarities and dissimilarities can be observed in text types of original and translated texts? Part I deals with methodological aspects and offers a typology of translations both as product and as process. Part II is devoted to domain-specific texts in a cross-cultural perspective, while Part III is concerned with terminology and lexicon as well as the constraints of mode and medium involving dubbing and subtitling as translation methods. Sonnets, sagas, fairy tales, novels and feature films, sermons, political speeches, international treaties, instruction leaflets, business letters, academic

lectures, academic articles, medical research articles, technical brochures and legal documents are but some of the texts under investigation. In sum, this volume provides a theoretical overview of major problems and possibilities as well as investigations into a variety of text types with practical suggestions that deserve to be weighted by anyone considering the relation between text typology and translation. The volume is indispensable for the translator in his/her efforts to become a "competent text-aware professional".

Cursing in America Timothy Jay 1992-01-01 This is the first serious and extensive examination of American cursing from a psycholinguistic-contextual point of view. Several field studies and numerous laboratory-based experiments focus on the relationship between cursing and language acquisitions, anger expression, gender stereotypes, semantics, and offensiveness. Censorship, language content of motion pictures, First-Amendment fighting words, sexual harassment, obscene phone calls, and cursing at public schools are analyzed and related to sociolinguistic and psycholinguistic data. Many tables of word-by-word data provide empirical evidence of frequency of occurrence, degree of offensiveness, gender of speaker and age of speaker influences on obscene language usage in America. A "must" for language reference collections.
