Architects' Data Ernst Neufert 1991-01-15 This is an essential aid in the initial design and planning of a project. The relevant building type is located by a comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled.

[The Inside Scoop on Eating Disorder Recovery](#) Colleen Reichmann

2021-03-31 The Inside Scoop on Eating Disorder Recovery is a fresh, smart, how-to book that helps people with eating disorders to heal their relationship with food, their bodies, and ultimately themselves. Written from the perspective of two eating disorder therapists, both of whom are recovered from their own eating disorders, the text uses humor, personal narratives, and research-proven techniques to offer specific actionable guidelines on how to reclaim one's life from an eating disorder. The authors explain the difference between dieting and eating disorders, break down the stages of recovery, and provide tips on how to thrive in each stage. The book provides powerful myth-busting on topics that have historically not been addressed in eating disorder recovery books, such as clean eating and orthorexia, exercising in recovery, and fat positivity. Tangible exercises at the end of each chapter provide readers with advice and tips on implementing this approach to recovery in their day-to-day lives. The humorous and down-to-earth tone of the book creates an authentic and genuine feel that leaves those who struggle with

chronic dieting, eating disorders, and negative body image feeling connected and heard.

Competitive Strategy Michael E. Porter 2017-07-17 Porter's five forces analysis is a framework for analyzing the level of competition within an industry and business strategy development. It draws upon industrial organization (IO) economics to derive five forces that determine the competitive intensity and therefore the attractiveness of an industry. Attractiveness in this context refers to the overall industry profitability. An "unattractive" industry is one in which the combination of these five forces acts to drive down overall profitability. A very unattractive industry would be one approaching "pure competition," in which available profits for all firms are driven to normal profit. This analysis is associated with its principal innovator Michael E. Porter of Harvard University. This updated and expanded second edition of Book provides a user-friendly introduction to the subject, Taking a clear structural framework, it guides the reader through the subject's core elements. A flowing writing style combines with the use of illustrations and diagrams throughout the text to ensure the reader understands even the most complex of concepts. This succinct and enlightening overview is a required reading for all those interested in the subject. We hope you find this book useful in shaping your future career & Business.
