Here the Church rules with power absolute. The laws are simple, all sin is punished swiftly. Preachers enforce the Church's words like old West lawmen. But what happens when a Preacher refuses to kill? What happens when men of honor take a stand against their rulers?

A Historical Guide to Edith Wharton Carol J. Singley 2003-01-30 Edith Wharton, arguably the most important American female novelist, stands at a particular historical crossroads between sentimental lady writer and modern professional author. Her ability to cope with this collision of Victorian and modern sensibilities

makes her work especially interesting. Wharton also writes of American subjects at a time of great social and economic change-Darwinism, urbanization, capitalism, feminism, world war, and eugenics. She not only chronicles these changes in memorable detail, she sets them in perspective through her prodigious knowledge of history, philosophy, and religion. A Historical Guide to Edith Wharton provides scholarly and general readers with historical contexts that illuminate Wharton's life and writing in new, exciting ways. Essays in the volume expand our sense of Wharton as a novelist of manners and demonstrate her engagement with issues of her day.

Music and the Elusive Revolution Eric Drott 2011-07-02

In May 1968, France teetered on the brink of revolution as a series of student protests spiraled into the largest general strike the country has ever known. In the forty years since, May '68 has come to occupy a singular place in the modern political imagination, not just in France but across the world. Eric Drott examines the social, political, and cultural effects of May '68 on a wide variety of music in France, from the initial shock of 1968 through the "long" 1970s and the election of Mitterrand and the socialists in 1981. Drott's detailed account of how diverse music communities developed in response to 1968 and his pathbreaking reflections on the nature and significance of musical genre come together to provide insights into the relationships that link music, identity, and politics.

Chrysler's Turbine Car Steve Lehto 2010-10-01 Offering a behind-the-scenes look into the world of automotive research and development in the 1960s, this engaging narrative traces the birth of Chrysler's alternative "jet" car and reveals the story behind its sudden and mysterious demise. Relying on extensive research and firsthand accounts from surviving members of the turbine car program—including the metallurgist who created the exotic metals for the engine and the test driver who

drove it at Chrysler's proving grounds—this chronicle documents the bold development of an automobile with a jet turbine engine. In addition to running well on virtually any flammable liquid—including kerosene, vodka, heating oil, and Chanel N°5 perfume—the pioneering engines had one fifth the number of moving parts and required less maintenance than conventional engines. Despite the fleet's amazing performance over millions of miles by test drivers, Chrysler pulled the plug on the project and crushed almost all of the cars. The reasons behind the surprising end to the jet car fleet are finally explained here.

Heinz Kohut and the Psychology of the Self Allen M. Siegel 2008-02-21 Heinz Kohut's work represents an important departure from the Freudian tradition of psychoanalysis. A founder of the Self Psychology movement in America, he based his practice on the belief that narcissistic vulnerabilities play a significant part in the suffering that brings people for treatment. Written predominantly for a psychoanalytic audience Kohut's work is often difficult to interpret. Siegel uses examples from his own practice to show how Kohut's innovative theories can be applied to other forms of treatment.

April 4, 1968 Michael Eric Dyson 2009-01-06 On April 4, 1968, at 6:01 p.m., while he was standing on a balcony at a Memphis hotel, Martin Luther King Jr. was shot and fatally wounded. Only hours earlier King ended his final speech with the words, "I may not get there with you, but I want you to know tonight, that we as a people will get to the Promised Land." Acclaimed public intellectual and best-selling author Michael Eric Dyson examines how King fought, and faced, his own death, and how America can draw on his legacy in the twenty-first century. April 4, 1968 celebrates the leadership of Dr. King, and challenges America to renew its commitment to his vision.

Allies at Odds Eugenie M. Blang 2011-04-16 Allies at Odds examines America's Vietnam policy from 1961 to 1968 in an international context by focusing on the United States' relationship with its European partners France, West Germany, and Great Britain. The European response to America's Vietnam policy provides a framework to

assess this important chapter in recent American history within the wider perspective of international relations. Equally significant, the respective approaches to the "Vietnam question" by the Europeans and Americans reveal the ongoing challenge for nation-states of transcending narrowly defined state-centered policies for a global perspective pursuant of common goals among the trans-Atlantic allies. Blang explores the failure of France, West Germany, and Great Britain to significantly influence American policy-making.

Whisper Writing Melissa M. Jones 2004 Three teenage girls share their stories about life as students, as young women with disabilities, and as minorities in a male-dominated special education school culture.

Women's Rights and Women's Lives in France, 1944-1968 Claire Duchon 1994 Women's Rights and Women's Lives In France explores the everyday experiences of women between the liberation, and May 1968. In 1945, French women believed that a new era was beginning for them, in which they had finally won equality (the right to vote in 1944, equal pay and access to education and employment). But the new Republic considered that women's main role was that of motherhood. Competing visions of women's place had concrete implications for women's lives, influencing work, politics and ideals of femininity. Working from a wide range of sources, including women's magazines, prescriptive literature, political pamphlets, fiction and memoirs, and government reports, Claire Duchon follows the debates concerning women through twenty years, and grounds them in the changing social reality of postwar France.

Continuity and Change in Irish Poetry, 1966-2010 Eric Falci 2012-07-30 In this book, Eric Falci reshapes the story of Irish poetry since the 1960s. He shows how polemical arguments concerning the role of poetry in 1960s Ireland evolve into a set of formal and compositional strategies for emerging Irish poets in the mid 1970s and beyond. His study presents a cohesive picture of the relationship between Northern Irish poetry from the Republic of Ireland since World War II and traces the lineage of lyric practice from a unique historical perspective. At the same time, it recontextualizes late twentieth-century Irish poetry within the long Irish poetic tradition, places Irish writing more accurately within the field of postwar Anglophone poetry and offers a new account of lyric's critical capacities. Of interest to Irish studies and twentieth-century poetry specialists, this book provides a much-needed guide to some of the most inventive and notable poetry written in the past forty years.

"¡Mi Raza Primero!" (My People First!) Ernesto Chávez 2002 ¡Mi Raza Primero! is the first book to examine the Chicano movement's development in one locale--in this case Los Angeles, home of the largest population of people of Mexican descent outside of Mexico City. Ernesto Chávez focuses on four organizations that constituted the heart of the movement: The Brown Berets, the Chicano Moratorium Committee, La Raza Unida Party, and the Centro de Acción Social Autónomo, commonly known as CASA. Chávez examines and chronicles the ideas and tactics of the insurgency's leaders and their followers who, while differing in their goals and tactics, nonetheless came together as Chicanos and reformers. Deftly combining personal recollection and interviews of movement participants with an array of archival, newspaper, and secondary sources, Chávez provides an absorbing account of the events that constituted the Los Angeles-based Chicano movement. At the same time he offers insights into the emergence and the fate of the

movement elsewhere. He presents a critical analysis of the concept of Chicano nationalism, an idea shared by all leaders of the insurgency, and places it within a larger global and comparative framework. Examining such variables as gender, class, age, and power relationships, this book offers a sophisticated consideration of how ethnic nationalism and identity functioned in the United States during the 1960s and 1970s.

Wild Goose Moon Ben Shepperd 2010-05 "Molly Ivins, Texas columnist and wry observer of American culture, called 1968 'the year everything happened.' 1968 finds America engulfed in political and racial turmoil, assassinations, and a war seemingly without end. The year finds Tom Windham trying to deal with a few of life's basics - love, death, God, and sex. A sophomore at a conservative university in Dallas and the veteran of an upbringing in a small East Texas town, Tom sits uncomfortably on the cusp of adulthood. He is joined there by his roommate Brandeis. Along with the young women in their lives, their college friends, and their families, they experience the joys, struggles and tragedies of the year on a human scale. While the events of the operatic year keep intervening, changes in American attitudes toward sex, race, women, war and religion are also reflected in Wild Goose Moon"-- Publisher description.

Invitation to Classical Analysis Peter Duren 2020 This book gives a rigorous treatment of selected topics in classical analysis, with many applications and examples. The exposition is at the undergraduate level, building on basic principles of advanced calculus without appeal to more sophisticated techniques of complex analysis and Lebesgue integration. Among the topics covered are Fourier series and integrals, approximation theory, Stirling's formula, the gamma function, Bernoulli numbers and polynomials, the Riemann zeta function, Tauberian theorems, elliptic integrals, ramifications of the Cantor set, and a theoretical discussion of differential equations including power series solutions at regular singular points, Bessel functions, hypergeometric functions, and Sturm comparison theory. Preliminary chapters offer rapid reviews of basic principles and further background material such as infinite products and commonly applied inequalities. This book is designed for individual study but can also serve as a text for second-semester courses in advanced calculus. Each chapter concludes with an abundance of exercises. Historical notes discuss the evolution of mathematical ideas and their relevance to physical applications. Special features are capsule scientific biographies of the major players and a gallery of portraits. Although this book is designed for undergraduate students, others may find it an accessible source of information on classical topics that underlie modern developments in pure and applied mathematics.
